# Wi-Fi Setup Instructions
SolaX Power

1. With any wireless enabled device such as a laptop, tablet, smartphone etc. navigate to the device settings> Wi-Fi. Here you will see a List of SSID's that are visible, find the SSID **Solax_********* as shown in the screenshot and connect to it.

Please note. the network may show 'unsecured network' on some devices, this is normal.

2. Once connected to the **Solax_******** network**, open up any web browser on the device you are using. Some browsers will display a 'no internet connection' message. this is normal.

In the address bar at the top of the page. **NOT A GOOGLE SEARCH,** input the following IP address: **5.8.8.8** and press enter on the keyboard.

3. A box will appear asking you for a username and password. The details for this are **admin, admin** – both in lowercase.

DHCP	Static IP	System
Firmware Version:	2.33.7	
MAC address:	C8-93-46-76-88-A2	
SN:	SWDCBLCZPZ	
IP address:	192.168.0.183	
SSID:	SolaX	Find AP
Key:		Unhide
		save

4. Once signed in. this is the screen you will see. We need to click on the **'Find AP'** button.

A new window will appear with a list of available Wi-Fi networks in the area. Please click on your network.

SSID	Singnal
SolaX	82%
BUCHER	62%
BUCHER-V	60%
ADSap	25%
AdvancedDiagnosticsTestAP	20%

SSID:	SolaX	Find AP
Key:	••••••••••	Unhide

save

Save Config Done!Please wait 15 seconds!!!Return

5. You will now be brought back to the first screen, in the **'Key'** box please enter the pass-word used to connect to your own network in this box and click on **'save'**.

Please note this is case sensitive and will not throw back an error if the password entered is incorrect.

6. The Wi-Fi connection is now complete. You can close the page down and re-connect back to your own network.
